Animal Care

Pure emu oil has been used by Australian Aboriginal people for thousands of years for medicinal, herbal and dietary needs. Emu oil is now been used and tested by thousands of people across the world for its amazing uses and benefits for humans and their pets! Safe to use on dogs, cats, birds, horses and all four legged friends.

- Relieves itching on animal's skin
- Effective on flea allergies, Mange, Eczema or Queensland Itch
- Soothes, moisturises and conditions dry and flaking skin
- Promotes hair growth
- Ideal for Show animals
- Keeps wounds cleaner, minimising risk of infection
- Reduces proud flesh
- Reduces swelling and inflammation, stiffness and pain in muscles, joint and tendon injuries

Vetinary grade pure emu oil is ideal for massage on injured lame and arthritic animals

Animal Wash

Wash and shampoo your pet as normal with emu oil shampoo. Only small amounts are required as products are very rich. Use enough to lather your pet, leave for a few minutes for the oils to absorb and rise as normal. Do not use any other fragrances, conditioners etc after wash, this will only irritate the skin. Adds gloss & shine to the coat as well as sooth the skin.

Pure Emu oil

Because emu oil is sterile, it can be used topically on cuts, wounds and burns. It can also be rubbed directly into bruises, arthretic joints and strained muscles. Internally, a teaspoon a day for dogs and cats and 50mls a day for horses in their feed will treat arthritis, eczema and inflammation due to flea bites. Emu oil will keep your animals coat soft and in great condition, free from any irritations- will keep your animal healthy inside and out all year round!

We are horse people and have been using it for years, for the horses, dogs and the family!

If in doubt feel free to call up and ask!! We are happy to help! Or email: Sharon@thullii.com.au
